

# STROKE CARE FIELD TRAINING EXPERIENCE

Learn from an expert near you!!

Funding Available for  
qualified participants

## Two options to choose from:

### Individual Learning Experience

The Individual Learning Experience Program will support one or more learners to spend time with a health care provider(s) working in stroke care to share expertise, knowledge and develop hands-on skills. You will have the opportunity to develop your expertise in stroke assessment/management and to promote integration of stroke care across the continuum of care.

### On-Site Group Learning Experience

The Group Learning Program is designed to support an expert instructor to deliver an educational event for a group of health care workers working in stroke care to develop their knowledge and skills related to a specific aspect of stroke care. This experience will typically take place at the recipient groups work location.
