

# AlphaFIM® Instrument for Stroke

### What is it?

## AlphaFIM® Instrument

- Standardized method of assessing patient disability/functional status in the acute care setting
- Consists of six items that can be reliably collected in acute care
- ⇒ Facilitates the transfer of patients from acute care to rehabilitation by using common language

AlphaFIM® Components
6 Items are rated:

#### MOTOR

- 1. Toilet Transfer
- 2. Bowel Management

If patient walks <150 feet: If patient walks ≥150 feet:

3. Eating

3. Walking

4. Grooming

4. Bed Transfer

#### COGNITION

- 5. Expression
- 6. Memory

## AlphaFIM® Rating:

| 7 – Complete independence (timely, safely)<br>6 – Modified independence (device)  | No<br>Helper |
|---|--------------|
| Modified Dependence   |              |
| <ul> <li>5 – Supervision</li> <li>4 – Minimal Assist (Subject ≥ 75%)</li> <li>3 – Moderate Assist (Subject = 50 - 74%)</li> </ul> | Helper       |
| Complete Dependence   |              |
| 2 – Maximal Assist (Subject = 25 - 49%)<br>1 – Total Assist (Subject <25%)  |              |

## Triage Guidelines\*

| AlphaFIM® Score |          | Recommended Referral   |
|-----------------|----------|--|
| Mild            | > 80     | Community-based rehabilitation   |
| Moderate        | 40 to 80 | Inpatient rehabilitation   |
| Severe          | < 40     | Admit to inpatient rehabilitation, if eligible, OR consider an alternate program (e.g. restorative care /short term complex medical) with regular assessment for admission to inpatient rehabilitation |

\*The AlphaFIM® score is only **one** component for consideration in discharge planning.

#### Further info about the AlphaFIM® instrument:

For further information on the AlphaFIM® Instrument please contact the Ontario Stroke Network at:

or

info@ontariostrokenetwork.ca

## Who Completes it?

Acute Care Allied Health and Nursing Assessors must be credentialed; but all team members may be consulted for information gathering.

When: Day 3 post admission

### Benefits

- Utilize a common language for functional status and rehabilitation needs
- → Provide objective data regarding disability and stroke severity
- ⇒ Facilitate transfer of information to inpatient stroke rehabilitation
- → Help make decisions regarding discharge from acute care
  - amount of help needed
  - best destination

### What it Provides:

- Standardized Measure of Stroke Severity and Function
- Motor and Cognitive rating
- → Projected FIM® score\*
- → Help Needed (in hours per day)
