Physician Referring No: _____ Date: _____

Office contact info: Phone: _____ Fax: _____

Onset of event: (date) _____ **Duration of event:** _____

Event Description:

Please attach clinic note, medical history and/or ER record for more info.

INVESTIGATIONS (Indicate date of test)

- EKG _____
- 48 Hour Holter _____
- CTA Scan – Head _____
- Echocardiogram _____
- Carotid Doppler (if CTA not available) _____
- Outpatient FASTING BW _____

MEDICATIONS (Name/dose)

- Antiplatelet: _____
- Lipid Lowering Agent: _____
- Ace Inhibitor: _____
- Other: _____
- Allergies: _____

SIGNS AND SYMPTOMS OF TIA/CVA: (please specify)

- Sensory Motor Amaurosis Fugax
- Right Left Face Arm Leg
- Vertigo Other: _____

VASCULAR RISK FACTORS:

- Age HTN Hx TIA/CVA
- Weight Cholesterol A-Fib
- Sedentary DM Known carotid stenosis
- Family History

Smoker Never Current Pack Years _____

Recommendations:

1. Refer all patients with TIA/CVA to the Vascular Protection Clinic.
2. Consider admitting crescendo TIAs; persisting deficits of new onset.
3. Start or change antiplatelet therapy if complete resolution of event (or if negative CT scan)
4. Carotid dopplers (or CT-A) within 24 hours of an anterior circulation event.
5. Consider ENT referral for vertigo without associated neurologic signs and symptoms
6. Consider patients without an event but at high risk i.e. if ≥ 3 risk factors, or significantly poor control of 1 or more risk factors, for referral re primary prevention.
