

Pupils Vision Therapy
Development & Rehabilitation

APPROACH

Dr. Wareham applies a neuroscientific approach to the practice of optometry by providing Vision Therapy for patients with developmental vision problems or who require vision rehabilitation following brain injury. He loves a challenge and celebrates in the success of his patients.

CONTINUED EDUCATION

- Dr. Wareham continued his education with post graduate studies from the Optometric Extension Program as he completed courses in Visual Dysfunction, Learning Related Vision Problems, Strabismus & Amblyopia Therapy and Traumatic Brain Injury Rehabilitation.
- Dr. Wareham has also completed course work with the College of Vision Development, Neuro-Optometric Rehabilitation Association, Padula Institute, and College of Syntonic.

CAREER HIGHLIGHTS

- Dr. Wareham is a founding board member of the Canadian Optometrists in Vision Therapy & Rehabilitation (now known as Vision Therapy Canada), a non-profit organization dedicated to elevating vision therapy awareness and education across Canada.
- Dr. Wareham is a contributing member for the Ontario Neurotrauma Foundation Guidelines for Concussion/Mild Traumatic Brain Injury & Persistent Symptoms (Adults).

MISSION STATEMENT

At Pupils Vision Therapy, we are dedicated to providing the gold-standard Vision Therapy experience: office-based therapy with highly trained vision therapists operating under the guidance of trained optometrists.

DR. JONATHAN WAREHAM

OPTOMETRIST

ACADEMIC BACKGROUND
